

JET GRIND 10EP

Stoughcool Jet Grind 10EP is a high performance, highly refined water white mineral oil grinding fluid formulated for multiple grinding applications including Tungsten Carbide, High Speed Steel, PCD and Stainless Steel. It is formulated with an excellent lubrication package providing outstanding wheel life and finish. The Jet Grind 10EP has a very low viscosity allowing it to penetrate and flush, keeping the grinding wheel and tools very clean and easy to use. The low-viscosity formula also allows for excellent circulation and rapid settling and removal of fines resulting in excellent filter life. It is compatible for use on all types of carbide, as well as ferrous and some non-ferrous metals. This extremely clean fluid prevents cobalt leaching of carbide and is light colored and appears water-white and has a mild fragrance added for operator acceptance.

LAB DATA	
Specific Gravity	0.836
Density	6.98
Viscosity @ 40° C	10cST
